## PROJECTS UNDERTAKEN

### Android Application's

Drop-Us Application is Based on the idea of vehicle Pooling. As we know today traffic is major problem and that also causes pollution in Environment. This Application provides benefits to users by sharing its own vehicle and helps to save fuel and money.

As we know today most of the travel with their own vehicle but they don't utilize properly which cause air pollution and make environment poisonous for Living Beings.

### Real Time Blood Bank Management System(RTBMS)

Real-time inventory of blood availability during disasters in the affected area; geographic mapping of blood banks/ hospitals across the country to provide better access to blood through a mobile application. RTBMS will keep the hospitals, blood banks and individuals all over the country interlinked with each other and also update them with the changing availability of blood units at various blood banks and hospitals time to time.
